

DoorLeaves™

A complimentary range of aluminium and glazed doors is specifically designed to suit our product range.

NewYorker™

A pre-finished aluminium door frame that can be glazed using a wide range of materials, glass being the most common. Invisible fixings compliment a robust frame that enables oversize door design whilst retaining classical dimensions and detail.

- ▮ Door Frames may be P/C or Anodised.
- ▮ Designed to fit our sliding door hardware quickly and easily.
- ▮ Assembly materials used ensure doors will never rust, rot or bow.

ParisiaN™

A pre-finished aluminium door frame that can be glazed using a wide range of materials, glass being the most common. Invisible fixings compliment a more minimalist frame that encourages greater vision space.

- ▮ Door Frames may be P/C or Anodised.
- ▮ Designed with passage or non-latching hardware in mind.
- ▮ Assembly materials used ensure doors will never rust, rot or bow.

VeronA™

A modern, stylish door that is pre-finished with high quality coloured acrylic sheet over a robust aluminium door frame. A range of complimentary hardware can be factory fitted ensuring a neat professional look to your door!

- ▮ Vertical edge clashings may be P/C or Anodised.
- ▮ A variety of modern acrylic skin colours are available.
- ▮ Suited to a maximum size of 2400 x 1200mm with no sheet joins.

AluTeC™

A flush, sleek pre-finished door with no visible screws or fastenings that is constructed entirely of aluminium. This door can not rust, rot, or bow - even when made to oversize proportions. The neat clashing system ensures that even the most discerning door expert will be impressed.

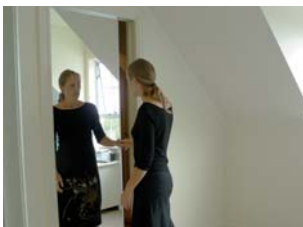

- ▮ Door may be P/C or primed ready for finishing
- ▮ Designed to suit sliding, hinged or even pivot applications.
- ▮ Assembly materials used ensure doors will never rust, rot or bow.

AluLite™

The most versatile aluminium framed door in our range. Assembled with no visible screws or fastenings, this door incorporates many skin finishing options including Whiteboard / X-Ray / Patterned - all four edges are clashed neatly. Door cannot rust, rot or bow.

- ▮ Door frames may be skinned with a variety of materials.
- ▮ Most standard door hardware is easily factory fitted.
- ▮ Assembly materials used ensure doors will never rust, rot or bow.

MirrorLite™

Stability is assured with this high quality double sided mirror door that looks great in either residential or commercial applications. Full length mirror ensures the best viewing mirror door available. Supplied complete with built in edge pull and recessed side grips.

- ▮ Vertical edge clashings are natural anodised.
- ▮ Passage hardware is incorporated neatly into the door assembly.
- ▮ Suited to a max. size of 2400 x 1200mm with no glass join.

AluMaX™

This door suits all extremes. You can expect the AluMaX to meet your design requirements whether they are based on looks, size or functionality. Manufactured entirely from aluminium, these doors suit interior or exterior conditions as wall sliders, gates or factory entries.

- ▮ Door sections may be P/C or Anodised.
- ▮ 65mm thickness ensures a robust feel and look is created.
- ▮ Assembly materials used ensure doors will never rust, rot or bow.

Door Selector Guide

www.csfordoors.co.nz

Having been in doors since 1986, we understand how challenging it can be to choose the right door/s for your projects. This is especially true when you consider the variety of applications possible in contemporary building design. This guide has been designed to make the process of selecting the right doors, regardless of the application, easier for you. We hope you find it useful.

Please note that this list of doors and applications is a *guide* only. For further expert advice, please consult your Account Manager.
