

Need accurate machining services?

Engineering Dept™

CS FOR DOORS has over 25 years experience in providing solutions to the residential, architectural and commercial sectors of the building industry.

As part of an ongoing investment in people and technology to make products to a higher standard, CS FOR DOORS has created an in-house engineering workshop to supply machined components for assembly in our products.

We can now offer this capability to you. The machine shop has two state of the art Haas milling machines with full time qualified operators that ensure your job is produced on time and to specification.

As well as these machines we have a range of associated services and machinery that compliment the machine shop.

Service Features

- Complete engineering design service if required.
- Full 3D CAD modelling provided if required.
- All work machined on site in our Mt Wellington factory.
- 3m wide guillotine facility on site, with 6 x 2m x 2mm thick sheet available ex stock.
- Polishing/Linishing service.
- Long run milling machine for longer machined extrusions and/or parts.
- Assembly of machined components also available.
- Small machined parts to complete assemblies considered.
- Complete supply service including materials.

Don't Delay!

Avoid disappointment and contact the machine shop manager now on **920 3756** to have your job appraised or for further information email your name, company and job request to info@csfordoors.co.nz

↑ In house engineering consultants work with you to ensure accuracy.

↑ Solidworks 3D modelling process ensures clarity of work for all parties.

↑ Haas mill (1 of 2) with work underway.

↑ Haas lathe for turned jobs.

↑ Elumatec digital cutting saw. 10m roller beds for the longest extrusions.

↑ Elumatec long bed milling machine for accuracy on long lengths up to 7m.

↑ 3m wide guillotine and table. 6x2m aluminium sheet stock in background.

↑ Some examples of finished components from brass, aluminium and steel.

All jobs are priced on a shop estimate, plus materials and any tooling and finishing work required. Lead times and payment terms by negotiation.
